

BOUCHARD B120 RELEASE SHORELINE SEGMENT SUMMARY

5 Lan Drive, Suite 200
Westford, Massachusetts 01886
Tel. (978) 692-1114
Fax (978) 692-1115

GeoInsight Project Number 3871-002

SEGMENT IDENTIFICATION: **W1F-04**

SEGMENT NAME: **Brandt Island Cove**

SEGMENT LOCATION: **Mattapoisett, Massachusetts** (*Map attached*)

MAXIMUM DEGREE OF INITIAL OILING: Heavy (Oiling Score: 2.19)

SEGMENT INSPECTION STATUS: Passed IRAC criteria endpoints on 08/22/2003.

SITE-SPECIFIC INFORMATION

PHYSICAL CHARACTERISTICS:

Primary Shoreline Type/ Geology:

- 1F: Salt marshes.

Secondary Shoreline Type/ Geology:

- 1C: Mixed sand and gravel (pebble to boulder) and rip rap groins (jetties).

Hydrogeology:

- The segment is located within Brandt Island Cove and Buzzards Bay is located to the south. The majority of the segment is salt marsh and saltwater wetlands.

Bedrock Geology:

- Bedrock underlying this segment is identified as "Alaskite" bedrock formation. This bedrock consists of mafic-poor gneissic granite commonly containing muscovite (Zen, 1983).

ENVIRONMENTAL SENSITIVE RECEPTORS (Identified within 500 feet of segment):

Aquifer: None at segment.

Protected Open Space: At segment.

Public Ground Water Supply Wells: None at segment.

Public Surface Water Supply Wells: None at segment.

Areas of Critical Environmental Concern (ACEC): None at segment.

Vernal Pools: None at segment.

Priority Habitats of Rare Species: Adjacent to segment: Buzzards Bay aquatic environment.

Estimated Habitats of Rare Wildlife: Adjacent to segment: Buzzards Bay aquatic environment.

Floodplains: At segment: 100-year floodplain.

HUMAN SENSITIVE RECEPTORS (Identified within 500 feet of segment):

Segment Use: Private and semi-public marsh. Residential dwellings are located within 500 feet of the segment. A portion of the segment is accessible via roadway. Portions of the segment are not accessible by road, and are difficult to access.

Frequency of Use: Presumably seasonal and year round residential use.

SUMMARY OF INSPECTION ACTIVITIES

WRF INSPECTIONS

(Wildlife Field Reconnaissance- Shoreline or On-Water Observations; Bird Transect Study.)

WRF inspections pertaining to this segment were not conducted.

NRDA FIELD ACTIVITIES SUMMARY

(Natural Resource Damage Assessment)

Note: Includes Shoreline Cleanup Assessment Team (SCAT) inspections and activities. SCAT forms were completed by field inspection teams working under the direction of Unified Command.

DATE	SUMMARY OF INFORMATION RECORDED BY INSPECTION TEAM
05/08/2003	Trace oil coating (approximately less than 1% surface oil coverage) observed. Two small areas of oil (approximately 2 and 20 centimeters in diameter) were observed.

IRAC INSPECTIONS

(Unified Command Immediate Response Action Completion inspections and activities.)

DATE	SUMMARY OF INFORMATION RECORDED BY INSPECTION TEAM
08/22/2003	Small area of splatter (approximately 10 feet in length) was observed on fringing marsh. Segment met IRAC criteria endpoints. Note: only half of segment (near W1F-03) checked by IRAC team. Remainder of segment not inspected.

MCP FIELD ACTIVITIES SUMMARY

(Massachusetts Contingency Plan inspections and activities under the direction of the Licensed Site Professional-of-Record.)

DATE	SUMMARY OF INFORMATION RECORDED BY INSPECTION TEAM
11/05/2003	Site reconnaissance: Trace splatter was observed.
01/20/2004	Phase I characterization activities: Marsh intertidal sediment samples (W1F04 UIT-01, W1F04 UIT-02, and W1F04 UIT-03) were collected from three sample locations centered around N41°37.692' W70°48.896', N41°37.751' W70°48.958', and N41°37.972' W70°49.190', respectively. Each sample consisted of three grab samples collected approximately 30 feet apart and parallel to the shoreline, were composited in a laboratory, and analyzed for EPH fractions and PAHs by 8270C/SIM analysis.
08/24/2004	Site reconnaissance: Two dried tarballs (approximately 2 to 3 inches in diameter) were removed from the upper intertidal zone towards the southeastern portion of the segment. Trace splatter was observed in the lower intertidal zone on large boulders. A marsh sediment sample (W1F04 S01) was collected at N41°37.639' W70°48.842' and a surface water sample (W1F04 W01) was collected at N41°37.895' W70°48.899'.

Notes:

1. GeoInsight did not receive IRA citizen calls pertaining to this segment.
2. EPH = Extractable Petroleum Hydrocarbons.
3. PAH = Polynuclear Aromatic Hydrocarbons.
4. SIM = Selected Ion Monitoring.

NOTES:

1. Results in mg/Kg (milligrams per kilogram).
2. EPH: Extractable Petroleum Hydrocarbons.
3. ND(x): Constituent not detected at practical quantitation limits (PQL) noted in parentheses.
4. PAH by GC/MS-SIM: Polynuclear Aromatic Hydrocarbon analysis by Gas Chromatography/Mass Spectrometry with Selected Ion Monitoring.
5. j: Estimated concentration/ detected below standard laboratory reporting limits.
6. Bold values exceed laboratory PQL.
7. ER-L: Effects Range Low (Long and Morgan 1991).
8. NA: Not Applicable.
9. MCP: Massachusetts Contingency Plan.
