DATE	SUMMARY OF INFORMATION RECORDED BY INSPECTION TEAM
05/10/2003	Trace sporadic splatter oil was observed in the wrack line in the upper intertidal zone.
05/17/2003	A discontinuous area of oil coating (including tarballs and tar patties) was observed with approximately 11% to 50% surface oil coverage in the upper tidal zone near the southern portion of Ocean Drive, Daisy Way to Shore Avenue, and the Pier. Trace oil coating (approximately 1% to 10% surface oil coverage was observed between Shore Avenue and Bay View Avenue. Oiled snare was observed.
05/31/2003	Small drops of oil and tar patties were observed along the wrack line and upper tidal zone. An area with approximately less than 1% surface oil coverage (approximately 20 by 100 feet) was observed. Limited visibility noted during inspection due to wrack cover. Cleanup crew was on-site during the inspection.
06/06/2003	Cleanup crew was on-site during the inspection.
